Jupiter's Calendar

Four years in four lanes · Jupiter, Saturn, Rahu and Ketu, 2025 to 2028

2027 IN ONE LINE · JUPITER'S SIGN STAYS, RETROGRADE AND COMBUST SPANS

The top lane is the book's subject. Jupiter takes about a year to cross a sign, but a retrograde loop each year makes it cross most boundaries three times: Cancer and Leo in 2026 and 2027, Leo and Virgo in 2027 and 2028. The exalted Cancer bars carry an arrow; the short bars are the loops.

Beneath it, Saturn moves from Pisces to Aries and back, and Rahu and Ketu hold the Capricorn–Cancer axis until 24 June 2028, so that Jupiter's exalted stay of 2027 shares Cancer with Ketu. Each dotted line under Jupiter's lane is a month in the Sun's glare, once a year.

Exalted in Cancer

Ashlesha, a retrograde return, and a turn at 22 degrees 45 minutes

Jupiter enters Cancer on 25 January moving backward, in the fourth pada of Ashlesha, a nakshatra ruled by Mercury. It slides back through the third and second padas until it turns direct on 13 April at 22 degrees 45 minutes, then climbs back through the same degrees to the edge of the sign, leaving on 26 June at 05:18.

Ketu holds Cancer all year, and Jupiter meets it twice, on 1 March and on 20 April; from 10 March to 26 April Mars, in its own debility, joins them, the year's first gathering of three planets in one sign. From Cancer Jupiter aspects Scorpio, Capricorn, where Rahu stands, and Pisces, where Saturn stands, which is why the almanacs count this stretch as a relief for Saturn's Moon signs.

JUPITER IN ITS EXALTATION SIGN

The texts call Cancer Jupiter's sign of exaltation, deepest at 5 degrees, where it is at full strength. In 2027 Jupiter holds the sign for five months but only between its last third and its edge; the exalted Jupiter of the almanacs is a strong placement, read for the Moon signs whose good houses it falls in, not a promise for everyone.

Checked Against the Almanacs

Jupiter's 2027 sign entries beside published panchangs, IST for New Delhi, consulted on 8 November 2026

EVENT	DATE	THIS BOOK	DRIK PANCHANG	OTHER ALMANACS
Jupiter back into Cancer	25 Jan 2027	**01:31**	00:52	Astromitra 02:12
Jupiter into Leo	26 Jun 2027	**05:18**	05:43	Astromitra 04:50
Jupiter into Virgo	26 Nov 2027	**18:45**	19:17	Astromitra 18:06

Every date agrees. The minutes differ by up to about forty, and each almanac's times fit one slightly different Lahiri value on every Jupiter row, the backward entry of 25 January moving the other way: the mark of a convention, not an error. The next page shows why.

Southern Vakya almanacs, which many temples follow, compute Jupiter from older tables and can place Guru Peyarchi weeks away from these dates. The difference is one of method, and the next page names it.
